Rusty Burlaw, HoneyBeeSuite.com

The best thing about bees is their ability to bring people closer to nature. Since honey bees lead complex lives, caring for them forces us to think about our environment in new ways. I encourage science-based, common-sense beekeeping, and believe most people know more than they realize about the world around them. It is my goal to help them draw out and apply that knowledge.

- Master of Environmental Science, Evergreen State College
- Bachelor of Science in Agronomic Crops, Oregon State University
- Director, Native Bee Conservancy
- Over 30 articles published in *Bee Craft Magazine*
- Moderator at 22th Annual Rachel Carson Forum, Olympia, Washington
- Frequent speaker on beekeeping and native bee conservation
- Expert witness in matters pertaining to bee behavior
- Webmaster at HoneyBeeSuite.com since December 2009
